AFOLABI PETER

Junior Full-Stack Engineer

Minna, Nigeria (open to remote) | +234 813 764 9314 | afolabiprosper329@gmail.com
Portfolio: portfolio-one-kappa-p2gg1ejjj4.vercel.app | linkedin.com/in/afolabipeter-dev | github.com/peterafolabi-dev

SUMMARY

Full-stack engineer with six live projects in Python/Django and TypeScript/React, all with code on GitHub. I build the parts users trust with money and data: payment verification, booking logic, access control and automated tests that run in CI on every push. Computer Engineering student, CGPA 3.79/5.00.

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, SQL, HTML, CSS
Frameworks	Django, Django REST, React, Next.js, Tailwind CSS, Bootstrap
Databases	PostgreSQL (Neon, Supabase), SQLite, IndexedDB; schema design, constraints, row-level security
Testing & DevOps	Django test framework, Vitest, property-based testing (fast-check), GitHub Actions CI, Git
Cloud & APIs	Vercel, Render, Supabase Edge Functions, Paystack, Google OAuth, Brevo email, Groq LLM API

EXPERIENCE

Software Engineering Intern, MALhub Aug 2026 – Oct 2026

Ilorin, Kwara State · On-site · Industrial Training (SIWES)

- Built **Travel & Stays** (travel-stays.vercel.app), a booking marketplace for stays and tours across Nigeria with guest, host and tour-guide roles, in React and Supabase.
- Made double bookings impossible with a PostgreSQL exclusion constraint on booking dates, instead of relying on checks in application code.
- Integrated Paystack (test mode) with server-side verification of the exact amount and currency before a booking is marked paid; covered by 11 unit tests in CI. Also designed host ID verification and row-level security policies.

Customer Support & Sales Assistant, Tools by FK Jul 2026 – Present

Remote · Part-time

- Advise students and professionals on AI and digital tools, and manage orders, subscription activations and account access end to end.

PROJECTS

Oja Ledger · oja-ledger.vercel.app 2026

TypeScript, React, Tailwind CSS, IndexedDB, PWA, Vitest, fast-check

- Offline double-entry bookkeeping app for Nigerian traders, with VAT returns and the small-company tax check under the Nigeria Tax Act 2025.
- Built a tamper-evident journal (SHA-256 hash chain) and integer-kobo money handling; property-based tests check four ledger invariants against 200 generated trading histories on every push.

RedCart · redcart-ten.vercel.app Dec 2025 – Present

Python, Django, PostgreSQL, Next.js, TypeScript, Paystack, Groq LLM

- E-commerce store with 103 products, Google sign-in, Paystack checkout, review fraud scoring and a daily email newsletter; 98 tests in CI.
- Built an AI shopping assistant that answers from the database and policy documents (retrieval) instead of guessing, plus a Next.js storefront on the store's REST API.

StudyFlow · studyflow-xt1x.onrender.com 2026

Python, Django, Tailwind CSS, KaTeX, Groq LLM

- Study platform for FUT Minna students with a 24/7 AI coach, deadlines, flashcards, email verification and daily study emails; 168 tests in CI.
- Secured file uploads by magic-byte checks and rate-limited AI features per user.

Also: LogiTrack · SpendWise 2026

- LogiTrack, shipment tracking with CSV manifest import (35 tests); SpendWise, personal finance app with decimal money maths and WebAuthn passkeys (33 tests). Both live, code on GitHub.

EDUCATION

B.Eng. Computer Engineering, Federal University of Technology Minna 2024 – 2028 (expected)

CGPA 3.79/5.00 (Second Class Upper).

CERTIFICATIONS

Frontend Development (12-week course), MALhub, Oct 2026 · Credential ID: malhub1086
